

# Made-in-Muskoka cleaning system set to revolutionize the way you get water

**THE ISSUE:** Muskoka's water infrastructure is old and in need of expensive, disruptive repairs. **LOCAL IMPACT:** A Bracebridge company has a patented process that is set to grow the local economy and clean everyone's drinking water.

Before

After

The above photos show the water pipe below Scott Street in Huntsville before and after the Bracebridge-made Tomahawk Cleaning system. The state of corrosion in the the before pipe is not remarkable to the area where the water mains are typically multiple decades old. The pipe on the left has been coated with a resin similar to a pool lining. June 14, 2018 - Submitted/Photo

## WATERMAIN REHABILITATION
